Resident or Business Owner

RE: Construction in your neighborhood.

Dear Resident or Business Owner,

Western Engineering will be constructing street improvements on Taylor Road and Sierra College Blvd. for the Town of Loomis. The name of this project is, 2014 Capital Improvement Program Project. This work will cause some traffic delays and inconvenience to yourselves and the public. It is Western Engineering's and the Town of Loomis' intent to help improve the neighborhood with minimal disturbance to the businesses and residents of the neighborhood.

Roadway work on Taylor Road will begin on September 3, 2014. This work will require lane closures and shifting of traffic to the shoulders adjacent to the roadway. Access to your home or business will always be available but please allow a few extra minutes for minor delays. Parking adjacent to Taylor Road may also be impacted at times. If you have any questions or concerns regarding this work please contact the following people:

Keith Kenworthy, Project Manager at Western Engineering, 916-652-3990

Brian Frাগiao, Town of Loomis Public Works Department 916-652-1840

Your patience and cooperation is greatly appreciated.

Sincerely,
Western Engineering Contractors, Inc.

Keith Kenworthy
Project Manager
